\* Ex-officio

nique of all operations—simple and complicated—by the Chiefs themselves.

Finally, the amount of medically useless activities which the Hospital Administration requires of Ward Residents has in the course of years reached colossal dimensions. This results in a considerable amount of loss of time to the Ward Residents. It is well-nigh impossible for the Ward Residents to be present at the educational functions of the Hospital unless these are organized at night. The Ward Residents would not be in a position to follow the courses of instruction outlined above as organized for the Residents in the Private Pavilions.

The Residency in the Private Pavilions, therefore, offers valuable training in clinical and operative surgery and in the basic medical sciences and suits exactly the needs of the returning Medical Officers and forms

an excellent preparation for further specialization in Surgery. It is to be foreseen that in the future the Mount Sinai Hospital may well require such a year Residency in the Private Pavilions as a prerequisite for Ward Residencies in Surgery, Urology, Gynecology, and Orthopedics.

In this way the number of assistant residencies has been increased from 14 to 32, of residencies from 26 to 40. In addition to this creation of 32 new positions on the House Staff, the reorganization of the medical and surgical residencies in the Semi-Private and Private Pavilions has transformed the former 2 medical and 8 surgical residencies in these Pavilions into educationally valuable assignments.

The factual increase, therefore, amounts to 42 senior House Staff positions.

- Year Book of Pediatrics, 1945.
- Year Book of Physical Medicine, 1945.
- Year Book of Radiology, 1945.
- Year Book of Urology, 1945.

#### CORRECTION

The Director, Board for the Investigation of Epidemic Diseases, Army Service Forces advises the Editor that the military title, Major M.C., erroneously appeared under the name of C. H. Rammelkamp in the Bulletin, Vol. 21, No. 12, p. 656, 1945.
